

Don't rush your MIM migration

Keep your environment stable and secure until the time is right

Microsoft Identity Manager Care Services

Your organization can continue using MIM for identity and access management until early-2029. While migration is inevitable, in the meantime, you must still guarantee that your business is running smoothly.

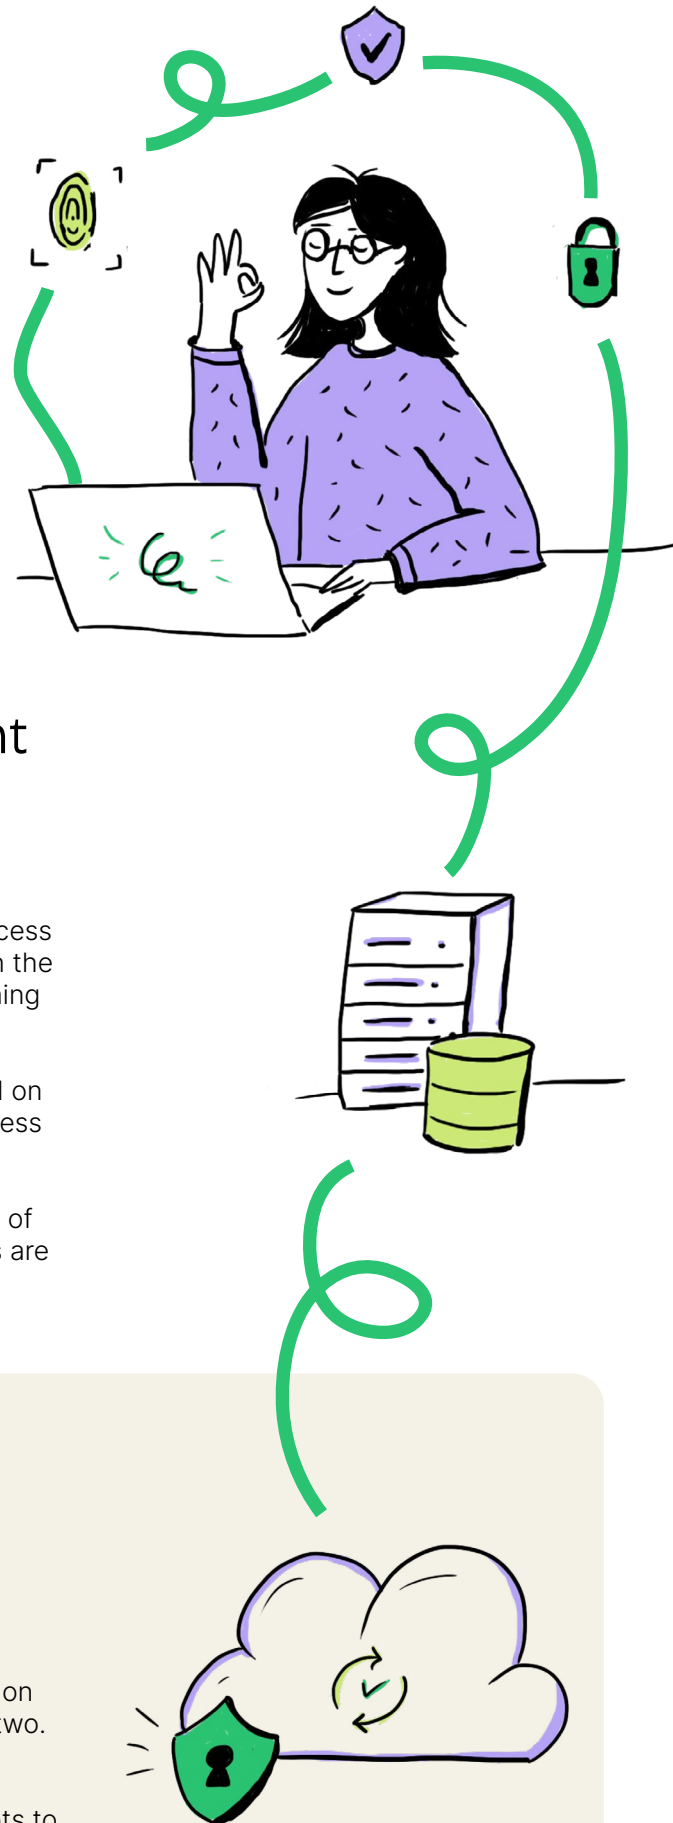

Qwey offers the first complete MIM support program focused on maintaining security and top performance of identity and access management solutions based on the Microsoft stack.

You'll get support from skilled technical specialists with years of experience handling MIM solutions, who'll make sure systems are ready for a smooth migration in the future.

Keep your MIM environment operational until migration

MIM Care is the right choice, regardless of whether you've already started preparing for MIM migration, haven't decided on the right replacement yet, or want to wait it out for a year or two.

After assessing your current setup, we will ensure your MIM environment is optimized and well-managed, and that it adapts to your organization's changing needs.

Pick a plan that works for you

The MIM Care program offers four tailored plans, each built around core pillars:

- ✓ Diagnostics
- ✓ Long-term care
- ✓ Emergency
- ✓ Specialist consultancy.

Plans vary depending on your MIM ecosystem's stability and the extent of customization needs:

Bronze

Your solution is stable and doesn't require changes to keep up with business needs. This plan focuses on fixes and changes in case of an emergency

Silver

You have a stable solution, want to be secure in case of an emergency, but your system requires occasional modifications

Gold

Your solution requires constant improvements. You also experience errors that require urgent support to prevent them from impacting your business.

Custom

Ideal for businesses with unique needs, such as requiring faster response times without fully customizing the solution. This plan is also applicable if you want to adjust the contract duration.

What's next?

Get in touch to discuss your MIM migration options.

We offer a free hourly call to learn about your existing system and discuss how we can help you transition to a new IAM/IGA solution.
