

Omada Identity Cloud Acceleration Services

Omada Identity is the **fastest and most effective solution** to implement identity governance and administration. Contrary to what many companies believe, not all businesses need to build bespoke IGA solutions from scratch.

Omada Identity is an out-of-the-box framework that is sufficient for most organizations to **safeguard cybersecurity**. It allows them to significantly cut time to value and save on resources.

The implementation includes 5 steps, and comes with a pre-defined scope of work, at a fixed fee. This makes it easy to navigate and monitor the entire process.

Acceleration Pack

A 12-week
plan

QWEY's Omada Acceleration Package involves a **12-week plan**, which involves the following:

01 **Envision**

Preliminary stage, where we engage in technical discovery and create an implementation plan. We recommend Omada features and modules that are most relevant to your business.

02 **Deploy**

Next, we will organize a set of workshops to review the data at your disposal and verify its quality. We will apply any adjustments, if necessary. At this stage, we also connect an authoritative identity source, i.e., your HR system.

03 **Integrate**

This step entails wider integration with your critical business and HR systems. With all the data at hand, we review initial policies, assigned access, and resources.

04 **Control**

After establishing the current and expected state, we develop the steps needed to achieve compliance. Among others, we configure approval workflows, enable self-service access requests, and run workshops on end-user experience optimization, including data classification and role descriptions.

05 **Automate**

The implemented solution begins to schedule data imports and automatic provisioning. The workflows are closely monitored during workshops and refined as needed to optimize the process.

After 12 weeks, you can expect:

- ✓ Complete Omada Identity Cloud implementation across the production, pre-production, and integration/development environments
- ✓ Fully functioning integration with the HR system, Active Directory, and two other business applications
- ✓ Comprehensive new system onboarding
- ✓ Self-serve capabilities and proper governance
- ✓ Basic role model featuring birthrights and assignment policies in line with identity attributes
- ✓ Training to ensure you're confident in using the Omada solution
- ✓ A detailed roadmap for further development and implementation.

Depending on your organization's needs, the Omada Identity implementation process can be followed by a **long-term advanced implementation package**.

QWEY can guide you in the selection of the best Omada features to increase data security and boost your efficiency through automation. We also build a roadmap for future IGA refinements.

Our advanced Omada pack

- ✓ Maturity level review
- ✓ Fit-gap analysis
- ✓ Knowledge base creation
- ✓ IT strategy
- ✓ Advanced governance through Segregation of Duties, RBAC, and Role Mining
- ✓ Onboarding applications

Do you use Microsoft Identity Manager?

If your organization operates on MIM, you'll be able to benefit from a native MIM-Omada integration. Both solutions can co-exist and you can migrate functionalities from the former to the latter in a sound, non-disruptive manner.

Working with QWEY means:

Peace of mind

We will walk you through the entire process, supporting you throughout the implementation of the new system. processes to make sure that the proposed solution fully meets your expectations.

Security

Your organization does not have to worry about security risks. Your infrastructure and systems will always be up and running and will be protected as you undergo the implementation.

Confidence

The whole team who participate in the process are tech specialists with over 10 years of experience in the Identity space. Our cooperation will be based around your needs and processes to make sure that the proposed solution fully meets your expectations.
